COMMENTS ON DRAFT REVISED GROUNDWATER FEASIBILITY STUDY REPORT, IR SITE 70, U.S. NAVAL WEAPONS STATION, SEAL BEACH

Dear Ms. Tamashiro:

We have completed our review of the above-referenced document, dated April 2005, which we received on April 14, 2005. We have the following comment:

Page R-B-27 Section B2.2.2.7 General Groundwater Cleanup Permit

A new general groundwater cleanup permit, Order No. R8-2002-0007, NPDES No. CAG918001, was adopted by the Regional Board on January 23, 2002. In addition, the Board adopted two amendments to this permit: Order No. R8-2002-0033, General Waste Discharge Requirements for the ReInjection/Percolation of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Petroleum Hydrocarbons, Solvents and/or Petroleum Hydrocarbons Mixed with Lead and /or Solvents; and Order No. R8-2003-0085, which corrects the maximum daily effluent concentration limits that were specified in Order No. R8-2002-0007.

Please revise the Feasibility Study to correctly reference these updated permits.

If you should have any questions, please call me at (951) 782-4498, or send e-mail to phannon@waterboards.ca.gov.

Sincerely,
